SOFTWARE ENGINEER

A highly motivated Software Engineer with 1 year of internship experience in developing mobile and web applications. Skilled in both frontend and backend development, with a focus on creating intuitive user interfaces, robust functionalities, and seamless integrations using modern technologies. Proven ability to lead projects and deliver high-quality solutions aligned with business goals.

PROFESSIONAL EXPERIENCE

Frontend Developer   **April 2025- Present**

Jaan Network

As a Frontend Developer at Jaan Network, I specialize in crafting responsive and user-centric web interfaces using ReactJS, HTML, CSS, and Tailwind CSS. Leveraging JavaScript (ES6), I build dynamic and interactive features that enhance user experiences. I collaborate closely with backend teams to integrate Laravel-based APIs and ensure seamless data interaction with MySQL databases. My focus is on writing clean, modular code, optimizing for performance, and ensuring cross-browser compatibility. I actively participate in code reviews, debugging, and translating UI/UX designs into high-quality, scalable applications, contributing to innovative and impactful projects.

Technologies Used

Web Applications Development   - ReactJS, HTML, CSS, Tailwind CSS, Javascript Laravel and MySQL

Full-stack Developer   **July 2023 - July 2024**

Cloud99X

During my internship at Cloud99X Pvt Ltd, i gained experience in developing mobile and web applications. Developed responsive user interfaces utilizing React and Tailwind CSS. Implemented server-side logic using Nest.js and worked with tools like Firebase for efficient data storage, retrieval, and management. Developed cross-platform mobile applications with React Native, incorporating navigation, state management, and API integrations into the mobile apps.

Technologies Used

Mobile Applications Development   - React Native, NestJS, Firebase, Google Maps API and Google Cloud Platform

Web Applications Development   - ReactJS, HTML, CSS, Tailwind CSS, NestJS and Firebase

TECHNOLOGY STACK

Programming Languages - Java, Python, JavaScript, R, HTML, CSS
Database Languages - MySQL, MongoDB
Machine Learning - Python, R
Operating Systems - macOS, Windows
Version Control - Git, GitHub
Frameworks - React + Vite, React Native, NestJS, ExpressJS, TailwindCSS
Tools - IntelliJ IDE, Eclipse IDE, Visual Studio Code, Android Studio, Xcode, Postman

PROJECTS

- **ToDoApp**

  This ExpressJS web application provides a simple implementation of CRUD (Create, Read, Update, Delete) operations using MongoDB as the database. It allows users to add new records, retrieve stored data, update existing entries, and delete records seamlessly. The application is built with ExpressJS, utilizing Mongoose for database interactions. It follows a RESTful API structure, making it easy to integrate with frontend applications or other services.

- **Hometeq**

  Hometeq is a web application built using PHP, MySQL, HTML, and CSS, designed to manage e-commerce functionalities. The backend, powered by PHP, handles user authentication, session management, and database interactions, while MySQL stores product details, user accounts, and orders.

- **SinNews**

  Developed a Sinhala news summarizer using React for the frontend and Flask for the backend. Fine-tuned the mT5 model on a custom dataset for Sinhala news summarization and integrated it into the system. Utilized Python for data processing, implemented a responsive UI with Tailwind CSS, and ensured secure handling of news articles.

EDUCATION

BEng (Hons) Software Engineering   **Sep 2021-2025**
Informatics Institute of Technology affiliated with the University of Westminster, UK.

G.C.E. Advanced Level   **2018-2020**
St. Joseph Vaz College, Wennappuwa

CERTIFICATIONS

Express Essential Training (LinkedIn Learning)
ReactJS Essential Training (LinkedIn Learning)
Introduction to Web APIs (LinkedIn Learning)
Flutter: Introduction (LinkedIn Learning)
Flutter: Building Apps (LinkedIn Learning)
Flutter: Flutter Widgets (LinkedIn Learning)
